

7027 BuckTootLow-Voltage LED Power Module

Product Overview

PRELIMINARY

The 7027 "BuckToot" LED Power Module is a true constantcurrent regulated driver for LEDs. Unlike standard power supplies, which deliver a fixed voltage to the output, the BuckToot LED driver is designed to reliably vary the output voltage as required to deliver a stable constant current to the LED(s). The BuckToot exhibits very high efficiency and does not require external current limiting resistors or additional heat sinking.

The extremely small form-factor of the 7027 BuckToot makes it the ideal choice for many MR-11 and MR-16 integration applications since it can easily be incorporated into the housing assembly. Fully potted and sealed from harsh environments, the BuckToot measures only 10mm diameter x 19mm long* and is supplied with 150mm 24AWG colored leads. Custom sizes can be created to meet customer requirements. Contact LuxDrive for more information.

7027 BuckToot LED Driver Module powering (6) Luxeon I LEDs in series (V_N≥24V)

Features

- ➤ DC input power up to 28V surge protected
- True constant current output
- Extremely small form-factor*
 (10mm diameter x 19mm length)
- Output open and short circuit protection

VIN (RED) VIN (BLACK) LED+(ORANGE) LED-(GREEN)

Figure 1. Wiring Connections

Typical Applications

- Solar & Landscape Lighting
- Architectural Lighting
- Track Lighting
- Automotive & Marine Lighting
- Portable Lighting & Flashlights
- Point of Purchase Lighting
- Desk & Reading Lamps
- Signal & Marker Lighting
- Cabinet & Display Case Lighting
- Sign & Channel Letters
- Much More...
